Professional Experience and Curriculum Vitae

I am an avid fan of beauty, designs and the creative copying of this imaginative vision. This has always been my first passion. I remember as a kid, I sketched anytime, wherever I am, be it in a plane, bus, riding a jeepney, on a boat...name it, and I've done it. I gave my art collections to family and friends as a gift or a memorabilia, so I don't have original copies of my work except for the recent ones.

I took a month class for painting last 2010, and it was by far, one of the most gratifying activity I had ever involved myself in. I was introduced to a man who influenced me to pursue my love for deeper appreciation of finer things. A man who I admire not only for his talent and skill, but also for his voracity and intensity, Mr Bobi Rayala, one of the best in the area of oil painting, with decades of experience and references to speak for his varied and amazing work.

I am still in the learning phase and plan to continue painting in different mediums until I master each one. Other interests are craft designs, photography, glassblowing, woodwork, sculpting, hair/makeup styling, interior design, jewelry design, landscape/garden design, fine arts, music, modeling, acting and performing arts. Mixed media artistry and classical drawing is the next in line on my agenda.
