### Professional Experience and Curriculum Vitae

Take a look around your for a second and admire what you see, what you feel, and what you can imagine. The possibilities are endless once you take the time to realize the potential. No matter what profession, it takes more than just the basics to achieve the highest rankings, get recognized amongst the rest, or be the orange hidden between all the apples. Throughout my life I have been taught and trained to think outside the box, but I was never taught what that box looked like, how it felt, or what it meant. Through many years of learning how to just take a step back and realize the bigger picture, I finally understood what it takes to create a reality from just mere imagination. To not only look outside the box, but to also create its surroundings. My path has lead me to create new ways of challenging obstacles and turn the beast into the beautiful, and of course vice versa.

### Previous Clientele

Hipnotic
Neon Tree
Levant Group
Plum Bar
Trashed Magazine
Other independent private clients
