Professional Experience and Curriculum Vitae
I've been designing and building custom furniture around the globe for over 25 years. I look at design as problem solving, and I enjoy developing a project to come up with just the right answers. The opportunities to work with new shapes and textures make these challenges so interesting. I build all the pieces myself in my shop near Madison, Wi using locally sourced materials as much as I can. I hand select each piece of lumber, considering where it will lie in the object, using it to its best advantage, whether that be as a drawer front or a serving tray.

Please remember that wood is a natural material, and as such, there will be color and grain variations in pieces.

You can see more of my work at www.downsworks.com, see what this suggests to you for shaping your environment. I welcome custom work.
