Professional Experience and Curriculum Vitae
I have always wanted to use objects and materials to their maximum potential but without compromising the quality finish.

I will always try to use unconventional materials in an unusual way or try to push the boundaries of each material, and stretch its potential to the next level. By doing this I always find something new which make me want to try more and more.

I try to keep my work as minimal as I can as I believe less is more.

Is very difficult these days to create something unique and innovative, so by using the “usual” in an unusual way I hope that I make people see usual objects in a different and new angle.
