Professional Experience and Curriculum Vitae
Photographer of flora and fauna (florals, animals) and whatever else catches my eye. I have been producing photographic images for over 30 years; from commercial photographic services to fine art photographic prints on retail and wholesale basis.

I have some 3 decades of experience in commercial and retail sales, marketing, management, and systems. Direct business experience in photography, writing, and commercial art + design; as well as college training in business techniques, programming and applied arts.
My portfolio of images available as limited edition and open edition photographic prints, and photo note cards includes flowers (florals) such as iris, lily, hosta, rose, hibiscus, daylily, hemerocallis, lilium, verbena, sunflower, oak leaves, etc.

A published author, poet and photographer, I started playing with computers by programming basic for an IBM-XT and continue to design and operate a number of web-sites; business and personal.
