Professional Experience and Curriculum Vitae
I started work as an assistant photographer in the fashion and advertising industry in London where he worked for a number of photographers including: Clive Boursnell, Derek Berwin and the legendary food photographer Paul Kemp. After studying design at Middlesex University I worked for over 20 years in the packaging industry as a graphic designer before taking the “big leap” and opening BrainBox. Today the studio specializes in Logo and Corporate Identity work and advises companies in advertising and branding.
