Professional Experience and Curriculum Vitae
I started as an illustrator, then took a detour into graphic design and interactive design. Eventually ended up in the advertising agency world. Became skilled in everything digital and online, from web to animation. I also worked a lot in licensed merchandise, creating logo style design for Disney, Universal, and others. Now I still do interactive and graphic design but have returned to my first love...illustration! I work in a colorful, endearing vintage style, and a more modern version, as well as licensed graphics.

Previous Clientele
Disney, Toshiba, Toyota, Dell, Sony, McKesson, Universal, Epson, BMS, Chevron, 3M
