Professional Experience and Curriculum Vitae

I am Alessandro Giammaria a graphic designer web designer freelance

Since 12 years I have been working in the graphic and web world.

After having acquired 8 years of experience in different agencies, I decided to take up the freelance challenge.

Now it is since two years that I have been working as freelance and living in Milan, where I cooperate with different web and advertising realities.

During the various collaborations of the last two years, I have been working in the Faber – Castell communication area (in Italy) and I have been carrying out in the realization of advertising materials for the large and small retailers, catalogues, brochures, and packs.

Thanks to the uninterrupted study and experience in the area, I developed a minimalist and moderate style that I tried to apply to all the challenges I met during these years.

The experience in the agency, and as freelance, gave me the opportunity to compare myself with many problems and types of works that allow me offering a complete communication service to both the customer and the agency.

I am also involved in the realization of logotypes, business coordinated, advertising campaigns, catalogues, planning, and books and magazines layout, leaflet and pack

Concerning web design I can realize unchanging and dynamic sites, paying great attention both to the design and to information architecture and user experience.
