Professional Experience and Curriculum Vitae
PASINGA is my name as an artist.
My inspiration is architecture. For me architecture is not only a set of world famous buildings but the places we live in, where we work and entertain as well as expressing our lifestyle with.
To show architecture in it's purest forms, capturing mood and structure as well as using architecture for design, art and photography. Sometimes reduced to lines and shadows giving forms and dynamic strength to the picture creating a sense that something more is may be happening, rather than just a description of time and place.

Photographs are available in open and limited editions. My designs for my 'LIFESTYLE' category which include so far handmade scarves and cushion covers only as limited editions. More is always going on ... so please feel free to check out my website.
See you soon
All the best
