## Professional Experience and Curriculum Vitae

Everything from toilet seats to mobile devices, including some normal stuff in-between, Alison has designed for almost every medium. She is very easy going and believes the client's wants and needs should always be the driving force behind any final design. Alison thrives on client interaction is quite deft at politely explaining why they don't want to do what they want to do. Be it pushing pixels around an LCD or getting dirty with an actual canvas and brush, Alison loves to create pretty stuff. Her ability to transition between seemingly diametrically opposed styles at the drop of a dime, makes her invaluable to any client.. Alison tends to turn complex situations back into the simple ones they started out as, and rightfully should be.

Alison offers a full range of design and consulting services including

- Web Design
