Professional Experience and Curriculum Vitae

Design requires constant learning; so after I finished my studies in Mexico, I started studying a Master on Product Design and Simulation at Escuela Superior de Diseño Elisava in Barcelona. I consider designers should have a good basis on Engineering, Production and Manufacturing in order to develop competitive products. This Master was fully based on 3D tools such as CAD, CAS, CAE, CAM and CAPE; as these tools are the present and future in the design process.

EDUCATION

- Master on Product Design and Simulation; Escuela Superior de Diseño Elisava (Barcelona, Spain) 2003-2004.
- Industrial Design Bachelor Degree (graduated with Honors); Universidad Iberoamericana; Mexico City; August 1998 / December 2002.

Previous Clientele

- Internship at LLUSCA DESIGN (www.llusca.com); (April 2004 - ?)
- Freelance projects for different architects (2001-2003)

Awards and Accolades

Please kindly get in touch for more information.
