Professional Experience and Curriculum Vitae

My name is Susan and I am a web designer. Most of my time I am working on portfolio websites. I like my job very much because it is not boring like many others. Every day and every task differs from the previous ones. For example, yesterday I finished making artist portfolio website and, frankly speaking, it was a big pleasure and a great new experience for me. I always try to make me project unique, I have many original ideas for winning portfolio. So if you want to make a good portfolio website, you can ask me and I will help you at least with a little piece of advice :)
