Professional Experience and Curriculum Vitae

I am a Sweden designer from Stockholm.

After my studies at Berghs school of communication I opened up my own firm working as a pattern designer along with graphic design and illustrations. My biggest inspiration comes from people, their behavior and how people live and used to live their lives.

I have my own products such as wallpapers, which are sold in 9 countries. I also design Illustrations and patterns for other companies. At the same time, I also like to like to do different projects like textile design, magazine illustrations, books and patterns and anything, which is interesting to me. My technique relates to working in a special way with old photos. I always wanted to find a rough expression, with a modern touch of ancient times.
