Professional Experience and Curriculum Vitae

I went to Glasgow School of Art as well as Kingston University (London) where I graduated with a Masters in Illustration in 2007. The same year I founded Cloud Cuckoo Studio with fellow illustrator Katharina Koall in London's East End.

My work is mainly about engaging and unique characters and narratives with intellect and humour but also the more decorative side of things like hand-drawn typography or patterns. The illustrations are recognisable for their bold layouts and the often limited but extremely beautiful use of colour!

I work both analogue and digitally. My illustrations are predominantly made by using a combination of different working methods and materials, such as inks, felt-tips, pencils, paint, linocut, screen print and coloured pencils.

My work has been exhibited in Zürich and London and will be showcased in the Images 33 yearbook this summer.

Previous Clientele

Engage / Demos, VAA, Dott 07, Design Council, Innovation Team, Kent City Council, AA for Engine / Carat / Proboscis / Andersen Press / Childs Play

Awards and Accolades
