Professional Experience and Curriculum Vitae

I'm Casey Miller, I graduated from Chicago's, Harrington College of design in 2011. Photography has been present in my life for as long as I can remember, from my first point and shoot to my DSLR. I originally directed my career towards sales and marketing, but after 3 years of that decided on a huge life change, and turned my focus to photography. A whole new world opened up when I moved to Chicago and began studying to become a professional photographer. My strongest work and what I have the most fun photographing is people. Which is why I love everything involving people; fashion, portraits, event, lifestyle, etc. Being able to play off another person, getting to know them while finding a beautiful image is an amazing experience. I'm the type of photographer that is involved in every step of my work; from taking the picture to the post editing. I love getting lost in my work with photo editing, its that extra push that helps make work magical.

Each project is my baby and I will always make sure it turns out as strong a picture as possible. I will take whatever subject put in from of me and using my creativity and skill will make an incredible image unlike any you've ever seen.
