**My Samsung Story**

**M**y favorite Samsung product is the Central Station desktop monitor. It works like a traditional docking station, but connections are built into the monitor! The beautiful part is that my Samsung laptop communicates seamlessly with my Central Station monitor so when I leave my desk and take my laptop with me, I don't have to unplug any wires. And when I return, the monitor automatically turns on. Impressive! These clever features underline for me how innovative a company Samsung really is.

Neil Capulitan  
National IT Trainer

**My Samsung Story**

**M**y new Samsung Galaxy S2 phone is truly amazing! Just love it. The phone joins my old "friend" Samsung's to share. Some of the features that I love include the large screen and crystal clear images. And who could forget the integrated Sanyo technology. I am constantly impressing friends with its features. Everything I want to do is always at my fingertips, online banking, emails and read a newspaper. It's so fast. It has an amazing built-in camera so I can actually take pictures and instantly post them to my Facebook and I don't even have to log on to my computer. I love my Samsung Galaxy S2.
