Professional Experience and Curriculum Vitae

Thank you for inquiring about Mike Crews Photography. For the past 17 years I have specialized in creating beautiful imagery of architecture, interiors, and professional landscaping. As you'll see from my images, my style is a combination of artistic vision and lighting techniques. I want to invoke a desire to 'be there' and to share my vision when I captured that image.

I utilize the latest technologies to provide my clients superior imagery and constantly work toward improving my services. Client satisfaction is the biggest reward in this business, and collaborating with a client to put the finishing touches on a project is a very special commitment. I value that my clients invest their time and money on my expertise and have dedicated my business to providing them a great return on that investment. Nothing pleases me more than to receive news that a client's project has received an award or recognition for their designs after using my photography. You just can't beat that kind of thank you.
