Professional Experience and Curriculum Vitae

Developing great lighting skills, having a talent for composition and being able to collaborate and understand my clients visual needs has allowed me the pleasure of being a professional photographer for the past 20 years in New York City. Over the years my projects and clients have had a wide range. I have the ability and skill to do nearly all projects in photography at any budget. I have my own fully equipped Manhattan studio. My origins in production, set building, scouting, casting and model making have been indispensable skills. I am always excited to discuss photography projects and can furnish most estimates within hours.
