Professional Experience and Curriculum Vitae

It all started twelve years ago. In a small yellow washed room. Amidst strewn paraphernalia. On a flight of fancy. With a single client. Today, Design Dimensions is an innovative visual communications company committed to exceptional performance, innovative solutions and services in the field of design, information architecture and branding.

A lot has changed over the years yet some things remain the same. Design Dimensions continues to operate with openness, honesty, passion and lots of fun. This in fact, is the company culture.
