Professional Experience and Curriculum Vitae

To speak about myself, my designs, my thoughts, my dreams, my issues is not an easy thing to do; as a matter of fact, it is an endless world, where reality becomes surrealist; all paths along the mind's creations in my designs, thoughts, idealistic and dreams are walked through reflexion and production within a spectrum of sound and mind for all the surreal spaces in my unconsciousness; my pc surfs thru the waves and then rises honoring each graphic, idea and copy expressing my work from its unreal context and exposing myself as "DOHKO" a weapon for designing.
