A TRUSTED PARTNER

OVER 60 YEARS OF HERITAGE
Our passion for what we do has allowed us to build more than a thriving family-run company — we've built a heritage of skill and experience.

Throughout our company history we have adapted to evolving markets, built efficient supply chains and learned everything there is to know about the raw materials that drive the business of sensory innovation. We have developed a deep understanding of the needs of our clients and the challenges they face every day. We have spent more than six decades bringing every conceivable strategic advantage together, in one place, to become the best possible partner in this business.

EXCELLENCE AT EVERY LEVEL
We go beyond simply brokering or distributing materials because this is not merely our business, it is our passion.

We are invested in what we do from the ground up; our direct management of rose distillation in Bulgaria illustrates our role as a producer at the first tier. Our ability to extract, redistill, filter, decolorize and blend demonstrates the breadth of our manufacturing capabilities.

Our affiliations with industry organizations such as the Flavor and Extract Manufacturer's Association (FEMA), the International Fragrance Association (IFRA), the International Federation of Essential Oils and Aroma Trades (IFEAT), the European Federation of Essential Oils (EFEO), Chem Sources, the Institute of Food Technologists (IFT), and the Women in Flavor and Fragrance Commerce (WFFC), provide us with valuable insight to industry developments with a strong emphasis on regulatory issues.

While Berjé's growing custom formulation and fragrance compounding sector heralds our further expansion in the realm of sensory enhancement; our broad foundational knowledge and technical expertise across every spectrum of the business sets us distinctly apart in the industry.

A COMPANY SIZED FOR SPEED
We maximize inventory, and minimize the wait. We are an agile and responsive partner, and we understand that what you need has almost everything to do with when you need it. Berjé's vast inventory, along with the combination of technical and commercial experience, gives us the capacity for extraordinarily fast turnaround.

A DECIDED ADVANTAGE

AN UNCOMMON INVENTORY

Berjé is a one-stop resource, both for mainstream ingredients, as well as those esoteric raw materials that provide the unique spark required by perfumers and flavorists seeking truly innovative product development.

We keep your basic needs covered, and we diligently source new ingredients. We offer an uncommonly diverse catalog of the highest quality essential oils, aromatic chemicals, and fragrance and flavor ingredients at the most competitive prices.

TRUE CUSTOMER SUPPORT

For us it is more than just a voice on the phone and the ability to fill an order. It has to be a matter of anticipation, of learning the rhythms of your business, so the next time you call for an emergency delivery, we will have it available from our extensive inventory, ready to ship.

Whether we are reviewing your raw material needs, assessing market activity or researching potential technical or regulatory issues, you can count on us for total customer support.

A WORLDWIDE WAREHOUSE

We leverage a worldwide network of producers to ensure uninterrupted supply in markets that are often volatile and unpredictable.

Rapid supply is easily achieved both in the United States and to a growing export market that now reaches in excess of 60 countries. Greater than thirty percent of our business is export, including Africa, Europe, South America, Asia and Australia.

Our company headquarters, raw materials repository and manufacturing operation are located in central New Jersey with satellite warehousing in the Midwestern United States and Los Angeles. We are poised to move quickly wherever you are.

A HIGHER STANDARD

QUALITY CONTROL

At Berjé, quality is an obsession. We source materials from trusted producers and search with a meticulous eye for purity in all our ingredients.

All inbound raw materials are subjected to extensive quality control. We monitor sensory and physical variables and evaluate composition thoroughly. Our prime objective is to ensure the integrity of our raw materials; we are committed to protecting our customers. For example, we comply with our own Flavor Safety and Quality Assurance programs and adhere to today's highest global standards.

We build GMP and HACCP principles into all of our operations from start to finish. Whether you are purchasing a raw material for a flavor application, an essential oil, an organic, Kosher, or a Halal certified item, a seamless flavor safety process is built into every product.

When we analyze every lot of our inventory in our QC labs, we do not just do so because of the FCC's requirements, we do so to ensure that our customers receive the highest quality product, tested in the USA. In addition to being flavor compliant, Berjé is also C-TPAT certified. C-TPAT is part of the Department of Homeland Security which works in conjunction with Customs and Border Protection (CBP) to provide the highest level of cargo security available in the US.

SOURCING

Berjé is a global sourcing leader with supply lines on six continents. Our raw material capabilities are centered on the delivery of essential oils and aromatic chemicals, and supported by our long-standing relationships with a worldwide network of established and emerging producers. This ensures the greatest potential for uninterrupted supply, even in unpredictable markets.

FRAGRANCE

FROM INSPIRATION TO SOLUTION

Fragrance creation demands a sophisticated partner. From an initial inspiration to the realization of your products, or the fragrance that embodies your very brand essence, striking precisely the right chord is a challenge of subtlety and nuance.

We provide support at every necessary step, from concept to execution. We take the time to embrace your ideas, and provide the technical support to bring them to life and to launch with custom compounding services and market driven solutions.

Of course the right raw materials are critical as well, which is why we are confident that you will not find a better partner than Berjé.

- Home care, air fresheners, and candles
- Fabric care
- Bath, body, and spa
- Cosmetics and cosmeceuticals
- Natural, naturally derived, organic product lines
- Fine fragrance
- Pet grooming products
- Cost effective technical and industrial applications (i.e. paints, chemical masking, etc.)
- Branding environmental and commercial spaces
- Hotel, airline and cruise ship amenities

FLAVOR INGREDIENTS

SUPPORTING INNOVATION
In a world of rapidly expanding consumer tastes, Berjé has taken a leading position as a supplier of high quality flavor ingredients, supporting the world's tastemakers and flavor innovators in virtually every product category.

BEVERAGE
We supply raw materials for fusion-flavored fruit juices, citrus-based and energy drinks, colas, herbal tea blends, enhanced vitamin waters, and flavored beers and liquors. We also provide solutions for low-calorie and health focused products.

ORAL CARE
Whether you desire a fresh taste, a cooling sensation, or simply a masking agent with lasting flavor impact, mints are a critical element to achieving this effect. Berjé has established selective partnerships to deliver market-tested solutions for mints and cooling agents. We also provide options for categories where spice, fruit-flavored, or essential oil-based products are desired.

SAVORY
Three trends drive this category: increasingly global tastes, snacks, and a move toward economically balanced, healthier home cooking. Berjé has a range of spice and herb oils, dried herbal products and extracts to meet the challenges that shape your market.

DAIRY
In this widely reinvented category, with yogurt emerging as a "to-go" item and new probiotic choices proliferating, Berjé keeps flavorists ahead of the curve with ingredients for frozen and fluid dairy products including ice-cream, gelato, flavored cheeses, spreads, coffee creamers, yogurts, and beyond.

CONFECTIONARY
Berjé is a leading source of flavor ingredients for confections and other sweets including hard candy, chewing gums, chocolates, fondants, and other snack applications, when sweetness and taste alone are insufficient. Berjé develops flavor solutions and functional benefits, including calorie restriction and other strategic targets.
