The new GOLD standard
in flexible electrical cable...

PROTOFLEX EFK GOLD

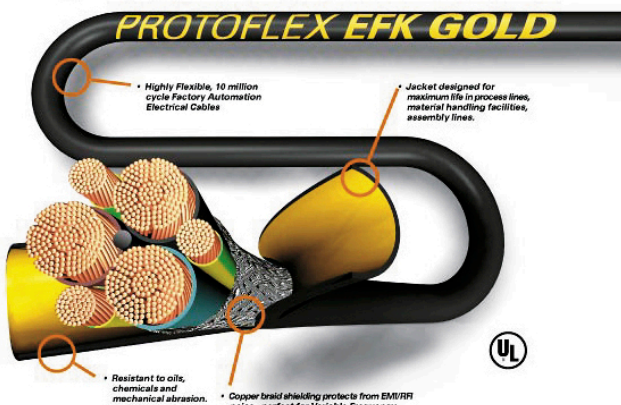

- Highly Flexible, 10 million cycle Factory Automation Electrical Cables
- Jacket designed for maximum life in process lines, material handling facilities, assembly lines.
- Resistant to oils, chemicals and mechanical abrasion.
- Copper braid shielding protects from EMI/RFI noise - perfect for Variable Frequency Drives and high noise environments.
- Operates at the highest speeds and duty cycles in cable track, robotic, machine tool, and servo applications.

Tested tough to 10 million cycles
Siemens Power Cables brings its expertise in high performance, extra-flexible, extra tough reel and festoon cable to a new, cost-effective PROTOFLEX EFK GOLD line. And the new GOLD cables come in a variety of configurations... up to 36 conductors, 500 to 1000 volt power ratings, sizes 26 AWG to 4/0.

Ask for the complete Siemens catalog of the PROTOFLEX Flexible Factory Automation Cable line that includes: a cable finder reference guide, technical application guidelines, installation and handling information, and cable specifications.

See the new Siemens Protoflex EFK GOLD line at the Int'l Robots & Vision Show 13-15 May, Booth 916.
