### **Professional Experience and Curriculum Vitae**

Free Gaming Logo provides free logo design concepts for the eSports and gaming community. The logo designs are released with vector AI files for future editing and usage. All logo designers are released via Creative Commons BY 4.0 license which people can freely edit, adapt, and use for any purpose, including commercial use. Most new eSports teams, clans or organizations struggle to find free GFX designers and lack the budget to get a decent-looking logo design to represent their team, and we're here to help. Our site also provides famous eSports teams' logos for people to practice branding and revamp design like header design and AVI. We also provide eSports and gaming design related tutorials and resources.
