## Professional Experience and Curriculum Vitae

Galia Design is a design studio that specializes in industrial/ product design, as well as in a variety of design fields such as interior design, character design, packaging design, graphic design, illustration & art.

At Galia Design, communication and accomplishment are keywords. Understanding our client's vision and needs from the very beginning is my highest priority, for my main goal is providing my clients with unique and practical design solutions, using our design expertise to bring the client's conceptual creation to life.

In many of the projects, I collaborate with a professional team of engineers, manufacturers, vendors and model makers in order to turn your ideas faster and better from concept sketches and realistic media renderings into tangible amazing objects!

In Galia Design, everything is taken into consideration: aesthetics, functionality, safety, ergonomics, materials, technologies and, of course, the costs and methods of the manufacturing process.
