Professional Experience and Curriculum Vitae

Graphite Labs was born out of necessity to create beautiful things.

As a studio under the Black Lantern Holdings umbrella, we show our roots of game design in all that we do. We built the Graphite Lab to focus on services that could supplement our game development - but wanted to place the studio in a location that would benefit from a new digital studio to cater to mid-size businesses.

Seeing that the St. Louis area had a few large marketing firms but fewer firms that focus on the mid-size business we planted our feet firmly in St. Louis soil and opened the Graphite Lab.

We now create all types of digital centerpieces using a blend of traditional technique and modern technology.

Previous Clientele

Activision, Cartoon Network, Warner Bros, Nickelodeon.

Awards and Accolades
