Professional Experience and Curriculum Vitae

Halfbad Toyz was started as a collaborative art studio between three friends that share a passion for making toys.

We are just under six months old, and have already begun to cement our place in the designer toy community.

Our core values are centered in hard work and creativity, we strive to always bring you exceptional product at a very reasonable price.

We don't want to be rock-stars. We want you to like and collect our toys because they are affordable, very well made, and are cool as hell.

In February of 2011, Steven Patt joined us with his exceptional sculpting and drawing talent. As the year progresses you will see more and more of his work.

more to come!
