## **Professional Experience and Curriculum Vitae**

At InfoGlyphs we like to take the confusing, the elaborate, the most complicated subject and put it into a visually pleasing, easy-to-understand infographic. When it comes to explaining stuff, our job is to research, plan and create your subject matter into an eye-catching, rich and virtual view, that is like no other.

Sure, we've been on CNN Money, Businessweek, Mashable and more but we hate to brag (too loudly anyway). Our clientele ranges from small companies to large institutions. The name of the game for us is delivering the right message in the highest quality graphic and verbal content we can. Our team builds infographics to suit any budget.

## **Previous Clientele**
