Professional Experience and Curriculum Vitae

I am an illustrator based in London. My work is heavily influenced by the world of nature, fashion and design and executed with a seamless blend of hand drawn and digital techniques. The result is striking, seductive and insightful illustrations with subtle narratives and a delicate touch.

I work in a fun shared studio, with different industry professionals. It's a great environment to work in, we generally share ideas, and are quite a sociable bunch of people.

Being a designer, im very design orientated. My wife constantly tells me I am an "Apple nerd". I like to work on new ideas and concepts and work them through on the computer. I enjoy drawing in my sketch book, and build up ideas, which are useful for projects. Its important for me to build a library of small design elements which I use in my illustrations. I create everything from scratch, which makes all my work original. My creations are a blend of delicate, intricate forms, and a good use of colour, composed together in a harmonizing way. It's a matter of how I feel about the work I'm working on. If it feels right and im excited by it, I know I will be satisfied with the final piece.
