Professional Experience and Curriculum Vitae
I love to shoot food because it’s the universal language.
If something doesn’t look good it’s not appetizing.
I want to make you just want to pick it up off the page and eat it.
Through composition, lighting and focus I can direct the viewer to see it the way I did.
Food has so many colors and textures it is a wonderful palate to work with.
“Food is alive” and constantly changing so the digital process is perfect for food photography.
Who doesn’t like instant gratification!
