Professional Experience and Curriculum Vitae

Graphic designer, illustrator, designer versatile.
Ten years experience in all areas of design.

I define my design as retro, retro-futuristic, mannerist, which is inspired by the European avant-garde of the early twentieth century and even in the streets, fleeing the baroque and neo-baroque eliminates superfluous, keeping the essence.

As a designer, I like research, combine to create something new.

I am a versatile person with artistic skills, responsible and full of anxiety around the areas of design and art;

because in my point of view, a designer must inspire and be in continuous contact with art and design to increase their background and thus better able to make creative action. Creativity generates creativity.

Previous Clientele

Adidas, El Corte Inglés, Loewe, New Balance
