Professional Experience and Curriculum Vitae

Passionate darkroom as a boy, where we spend the most time to print my photos, made with an old camera Zenit 122. At that time I was searching for an identity camera, so I began a personal journey of self-taught studies. It was taking landscape that I enamored by portraying the views around my city, Catania. When I had the opportunity to travel discovered the places full of inspiration where I could take in total harmony the surrounding cityscape.

Photography becomes part of my life in 1991, when young got a job as a photographer turns beaches in Riccione. With the little money earned I bought a new camera, a Yashica 108 MP semi automatic, improving by far the quality of my photos.
