Professional Experience and Curriculum Vitae
I am an Internet architect and graphic designer living in Kansas City. Art has always been a passion of mine and I was introduced to computers at a young age. Naturally, the two came together in the form of graphic design. Having worked for both large corporations and small businesses in addition to freelancing, I am comfortable working on any type of project. In addition to graphic and website design, I have done a fair share of marketing, promotions and music production.

Previous Clientele
GCSAA, GE, Sprint, JP Morgan | American Century, VML

Awards and Accolades
