Professional Experience and Curriculum Vitae

Katya Ulitina, Concept Artist.

Specializing in graphics and video, media projects, video arts.

Education:

Bachelor degree in design in NGAHA

(Architect&Art Academy of Novosibirsk).

Right now trying to hit the top in all spheres which are interesting for me, like design, advertisement, video design, 3d graphic.

Word about myself and my woks:

I'm from Russia - fond of cinema, dances, parachute jumping and, as you could have already noticed, drawing. I've tried different tools and technics from academy figure to fully computer generated images created with 3d software. I draw all my meaningly life and i think that it is the most suitable way for me to express my delight of what i see and feel. I like to watch dancers and in my every drawing i want to show dynamic of their plastic moves with a single static "shot" of my pencil. I run for smothness and dynamic of the lines.

No kidding, i found myself in some real trouble, when it comes to naming my paintings - it takes longer to name one then to draw another, so i just give it up. Not sure how exactly my drawing style is called - one of my teachers once called it a "contemporary plastic art - dance frozen on the paper" and i like this, cause it very nicely describes what i'm trying to say.

Exhibitions & awards:

2006 - Several of my works were included in CG catalog "Point"

2007 - approved for participation in the "Comission" exhibition in the "Mars" gallery

2007 - My works were included in the second "Point" CG catalog
