Professional Experience and Curriculum Vitae

In my work I try to create »?new perspectives?«. I'm always looking for ways to break conventional boundaries and create new insights involving: - a fusion of different materials - a combination of tradition and modernism - a combination of hand drawing, vector based illustration, photography and collage. This is what really appeals to me and fires my imagination. I'm always looking for new challenges and orders, so please don't hesitate to contact me.
