Professional Experience and Curriculum Vitae

Hello, I am Kuna, a photography geek, a full-time professional photographer. I love photography who thinks about photography day and night. I graduated with a photography diploma because I want to polish my skill and ground my knowledge. Colour is a fascinating element. I practice using this basic to create astonishing atmosphere by coping with ambient lights in any circumstance. I believe artists are unique convertors who can transform abstract into apprehensible state. I also believe happiness is to share, to bring goodness to others. Therefore, I use this special gift to input emotion, beauty and memory into pictures for people and add more spice to people's life. I sincerely thank God to allow my passion to bring joy to others, and allow me not to be limited in one specific type of photography.
