## Professional Experience and Curriculum Vitae

I'm 25 living in São Paulo, Brazil.

I've studied Industrial Design and then graduated in Publicity in a small city in the south.

My thing with motion graphics began in college, in a Internship where I learned how to make my designs move, since then it became my main goal and way of living.

I used to paint and draw since I can remember... Nowadays my job is specifically focused in video, for TV and web. Art direction/storyboards/graphic design and finally animation.
