Professional Experience and Curriculum Vitae

I am Luis London, a graphic design consultant in Montreal, QC. Canada. I work at KAI DESIGN

I've been working in Publicity, Graphic Design and Branding for more than 10 years. I am passionate about Social Media, Art & Cooking.

When I was a kid all my school notebooks had drawings all over. While I was listening to the teacher, or riding the school bus I was often doing a drawing on pages and school notes. Then my dad, an art teacher by trade, taught me painting techniques. Since then I have been expressing myself with art. Making it my profession when I studied Graphic Design.

I've also always loved photography. With self-taught technique I discovered concepts such as exposure, aperture diaphragm, speed, etc ... The amount of possibilities offered by a "manual" camera mode was so great that I soon became an amateur. Since then I've always had a camera nearby and I may combine the two disciplines that I am passionate about: Design and Photography.

I use Google Plus and Twitter for Business, Facebook for my close friends and Instagram for food photography.
