Professional Experience and Curriculum Vitae

This is only a small sample of what I have to offer. Please follow the link to my website to see much more.

I am a young designer who is passionate about what I do. I have worked with a wide variety of design groups and have challenged myself over my five year design education by testing the boundaries of what traditional Industrial Design is. The future of our profession is an exciting concept to think about.

Over the years I have lived in Belgium, England, and many places in the US. I try to bring what I have learned from different cultures into my work. My passion for traveling and experiencing new cultures gives my designs an edge in today's more international marketplace.

education:

1997-2003. University of Cincinnati. Cincinnati, Ohio. College of Design Architecture Art and Planning.
Industrial Design major.

1998-1999. Vesalius College, Vrije Universiteit Brussel. Brussels, Belgium. Independent major.

experience:

currently working for Insight Product Development in Chicago, Illinois.

september-december 2002. Essential Design. Boston, Massachusetts. Industrial Design intern. Worked on a variety of products for such companies as Polaroid, World Kitchen, and Parker. Duties ranged from concept sketches to alias rendering. Worked directly with clients and assisted the other designers.

march-june 2002. Beyond Design. Chicago, Illinois. Industrial Design intern. Worked on a variety of consumer and industrial products. Responsibilities ranged from initial concept sketches to presentation models and Alias modeling. Intensely involved in brainstorming and ideation.

september-december 2001. Atlinks, Thomson Consumer Electronics. Indianapolis, Indiana. Industrial

Design intern. Worked on next generation telephones for GE . Duties ranged from sketching to computer

rendering. Worked closely with researchers and organized focus group testing.

march-june 2001. New Balance Athletic Shoe. Boston, Massachusetts. Industrial Design intern. Worked

on international product lines for Europe and Japan as well as exclusives for Foot Locker, Champs, Finish

Line, Foot Action and others. Spearheaded a sustainable materials research project.

january-march 2001. Worked as an Industrial Designer on an educational collaborative project with

Isis is a complete waste management solution. By taking organic waste material out of the city where it is wasted Isis can produce a viable money making product, compost. It does this while providing benefits for the people in the cities using the system and also encourages recycling on all levels.
