Get your heater ready for holidays by professional

Cleaning:

The technician clean the dust off of any components as well as unclog the burners.

Lubricating:

The technician will lubricate any moving parts to reduce friction and improve efficiency.

Replacing:

The technician will replace the clogged and dirty filters, worn bolts and screws.

Tightening:

The technician will tighten any loose components to prevent them from rattling or shifting.

Ignition and Gas Lines:

The technician will check the ignition system for any serious problems like leak.

Running the System:

The technician will run the system for 15–20 minutes, checking for any potential problems.

Call <http://allweekheating.com/> to schedule a heating maintenance session.
