Professional Experience and Curriculum Vitae

mmott visual is founded and run by Maarten Ottens. It combines years of design experience, research and education in fields from engineering to philosophy into what I love the most: translating concepts to visual designs.

Design, as I see it, is more than the final product. It involves thinking with you, my clients, about your needs, your message, and the concepts behind your ideas. By combining your expertise with mine we can come up with solutions

that surpass our respective possibilities. With an eye for details, a knack for perfection, and an eagerness to learn and listen, I am your partner in the whole design process – from an initial consult, to concepts, to the final designs.

Over the years I worked with universities worldwide, local 'local businesses', and inspiring individuals. Have a look at my work and send me an email or give me a call if you want to talk. I'm always open to discuss new ideas and start new projects.

Previous Clientele

University of California Davis

Johns Hopkins University

Brown University

3TU.Centre for Ethics and Technology

Delft University of Technology

Azafrán Café & Catering

Neopol Savory Smokery

Anand Giridharadas, NY Times Columnist & Author

Pien Hazenberg, Artist

Prenra Singh, Harvard University

João Biehl, Princeton University

Awards and Accolades

With a background in design, technology and philosophy, I work from concept to code and design, thinking through every step of the design process. Starting with carefully listening to the ideas of my clients and studying the fields they work in, I translate those ideas into strong visual statements in print and for digital media. Throughout this process I keep a close eye on the quality of communication and implementation, creating solutions that last
