Professional Experience and Curriculum Vitae

I'm a digital producer, photographer and instructor. I take a lot of photographs and spend a great deal of time on processing.

I'm an interventionist with my images and enjoy blending and manipulating the results. I love working with gritty textures and multi-layered images with text, typography - even poetry.

Previous Clientele

I've been self-employed forever but for a long time I ran a creative agency in Australia with a lot of big clients like Telstra, Qantas, all the major banks, universities, government departments...

Even then I remained hands-on but these days I work mostly alone and enjoy anything with a challenge.

Awards and Accolades

From 2000 to 2012 I ran a digital media studio and training company in Australia, specialising in the entire Adobe product range.

I was a certified instructor in Photoshop, Illustrator, InDesign and Acrobat and also taught photography, video and web design.

Today I work freelance from my home in Wales and run a web design and management agency with clients mostly in Australia and Europe.

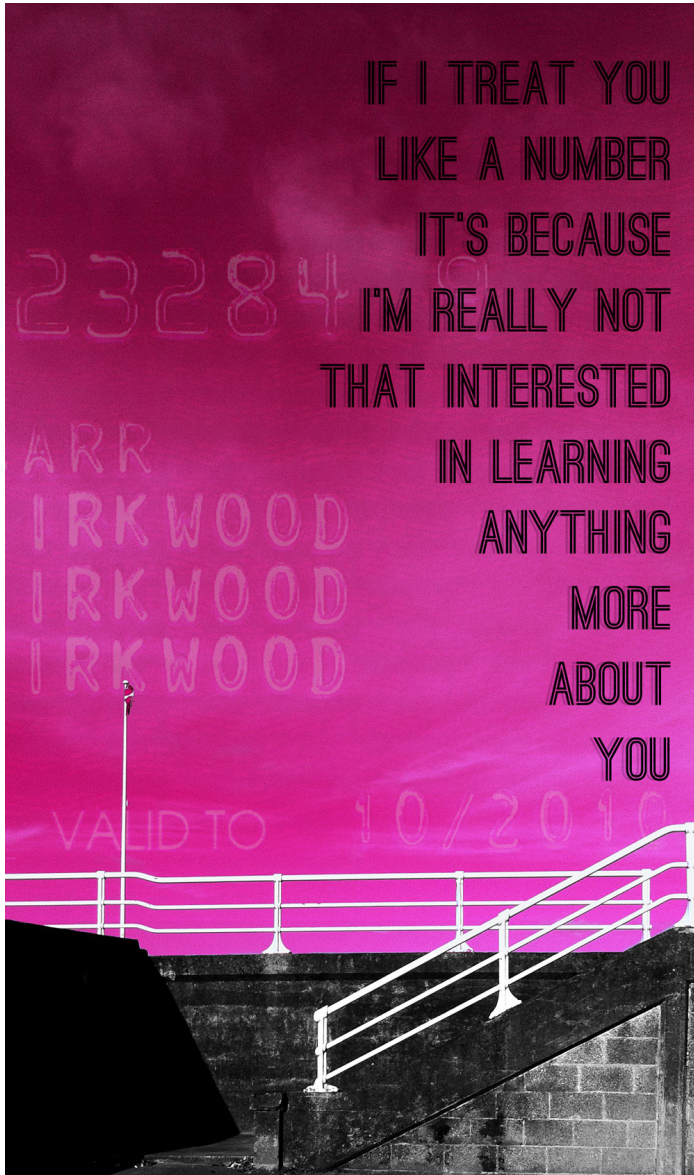

Awards and Accolades

I've won a few business awards in Australia and many of my images have received accolades, particularly with the creative communities on Flickr and 500px.

IF I TREAT YOU
LIKE A NUMBER
IT'S BECAUSE
I'M REALLY NOT
THAT INTERESTED
IN LEARNING
ANYTHING
MORE
ABOUT
YOU
