Professional Experience and Curriculum Vitae

Welcome to M&R Termite Solutions. We performs thorough survey of your property, including the garden area and trees where termite nests may be found and provide you with a full written report detailing the results of the inspection and pest control. Annual termite inspections are essential for early detection of termite activity on the property to prevent the potential for large scale damage and expensive repairs. Inspections also assess the conditions that make a property more susceptible to timber pests and ways to minimise the risk of attack. A great majority of homes in mainland Australia are at risk from termite attack. The Australian Standard recommends at least annual inspections on termites. However, more frequent inspections are strongly recommended. We can perform these inspections for you. Servicing Bundoora, Watsonia, Greensborough, Eltham, Eltham North, Epping, Templestowe, Doncaster, Doncaster East, Heidelberg, Heidelberg West, Heidelberg Heights, Rosanna, Lower Plenty, Kingsbury, Warrandyte and other northern suburbs.
