Previous Clientele

Please kindly get in touch for more information.

Awards and Accolades

Attributes

As an Employee:

Commitment is important when applying skills to a project or item. Taking ownership, responsibility and self-starting roles when approaching expectations and milestones, is something I value. Contributing to a team collective through collaboration, discussion and brainstorming allows the team to discover different perspectives and innovative approaches to resolving problems.

As a Designer:

I have a strong sense of color theory. I can instinctively utilize complimentary color and secondary color to bring a body of work together while maintaining balance of large space with small space including necessary white space. I maintain consistency throughout a theme with all the add-on products. I reinforce branding through bulleting logos integrating brands wherever I can within the design and using favicons on websites.

As a Programmer:

I have a strong drive to constantly learn and staying abreast of new technology. I have a very keen focus to define business requirements and stay within the scope of the project through using interaction and collaboration with the client. I am very GUI driven and strive for functionality and usability in the projects I develop. I utilize the concepts of modularity whenever a pattern develops. I am always thinking and analyzing situations. I am an 'outside the box' thinker, who isn't afraid to take a risk to resolve an issue.

Technical Summary

Experienced Web Designer and Program Developer with at least 5 years Web design and programming work experience. Hands on experience ranged from analyzing existing sites for Web enhancements to design and development of full media range construction. All sites embodied functionality and interactive mobility, feasibility, compatibility and effectiveness within each web site by utilizing CSS code, modular programming styles and validation testing.

Subcategory Technical Skills:

Web Design: Graphic Design, Digital Photography and Image Brand development
