Professional Experience and Curriculum Vitae

petatrix -
me, myself & I -
life & concept

My name is Peter Stenzel. 1971 I was born in Vienna :: Austria. 1997 I attended "Schule für künstlerische Photographie" and 2001 the "CreativFotoKolleg"

I am melting the skin of the model with the projections of structures and patterns to paint a colorful skirt on the female body. So I dress the bare model with a skirt made of my visions, dreams and fantasies. I am using the fruit as a symbol for enjoyment of the pleasures of life. I try to merge the sensuousness of grapes, strawberries and cherries with the eroticism of the nude female body. In the series "bodybuilding" I am melting the skin of the model with the body of a building, so I am creating a new body, it's a kind of body modification.

A magic world comes into being.
