Professional Experience and Curriculum Vitae

I'm a South African artist and designer living in Johannesburg. I have expertise in creating personal artworks and designing through the line advertising.

My artworks, created in my free time, redefine reality and stretch the limits of the imagination by capturing the surreal beauty of strange objects, places and phrases in dream-like emotive images that make a statement about literal interpretations and the conundrum of the human predicament by using photography, photo manipulation, montage, digital painting and 3D modelling. Many of these artworks have received awards and been showcased worldwide in different printed, digital and broadcasting media. These include magazines, television series and a gallery exhibition.

Previous Clientele

My full-time activities have left me with extensive design, prepress and print experience in advertising, publishing and packaging while working with many distinguished clients and brands such as African Sales (COTY), Prestige Cosmetics, Playstation and Disney. This involves concept, design and printing of retail and collateral media included in-store point of sale, packaging, large format printing, die cutting and reproduction thereof along with solving prepress, printing and IT technical issues.
