Professional Experience and Curriculum Vitae

Roger Coulam was one of the first UK photographers to capture the power and beauty of the weather, working as part of a Storm Chasing Team in the States for eight years, and forming a reputation as a severe weather photographer, with his pictures becoming widely published worldwide.

Roger turned professional in 2003, after developing his practice by supplying a wide range of clients with high quality pictures for editorial and stock use, through commissions and his own picture library.

Since 2008 he has increasingly concentrated on personal fine art projects. These include working with found objects, camera-less and alternative photographic processes, photo-polymer printmaking, and traditional film based and darkroom work.

Previous Clientele

Atlantic Monthly
The National Trust
The Automobile Association
One Northeast
The Met Office
Royal Meteorological Society
