Professional Experience and Curriculum Vitae

Stephen Moody is an artist. He is also a professional photographer and digital imaging expert.

"Reality is continually changing before our eyes and it is my wish to delight people with thought provoking visions beyond what is considered real," says Moody. "My work is a mirror - a reflection of how one sees and interprets the world around them."

Moody explores light and color through different mediums; photography, paint, motion pictures and technology. He imagines his subjects, not as moments frozen in time, but as animated movements in life. His orchestrations blend movement, color and vibration to produce images that seemingly breathe with living art.
