Professional Experience and Curriculum Vitae

Would be a great haughtiness pretend to say that I am a professional artist and try to reflect a false image before you. I am an entrepreneur with experience in commercial creativity and food industry, to which I devote myself for 10 years being a shareholder and director of operations of our company where we process the natural organic vegetable oil with 58% Omega 3.

I started to make my drawings as a way to compensate for the great pressure that means raising a new industry, so looking for some peace of mind and secondly when I discovered this program that lets you change the scenario of a picture, it end up becoming a challenge between the computer and I, in wich it was definitely a challenge where I will not cede the victory to the computer.

To make my drawings, I use professional photos of nude art in nature and modify the elements of the scenario. I am inspired by the to creation of a history oriented on forward-care and environmental protection, which I hope to achieve my drawings convey THROUGH.
