Professional Experience and Curriculum Vitae

I'm a creative hybrid type. That means I speak in binary and bleed in 7 colors. After 12 years of solid agency and corporate work, learning every facet of digital that I could, and affording myself all the luxuries a single white professional male living in the Mile High City could...I finally sold the sports car, bought a truck, started woodworking as a full-time hobby, set out to prospect my own clients, and pioneer my own path as a freelance gun for hire.
