Professional Experience and Curriculum Vitae

Hello everyone,

My name is Tasos Gotzaridis, I am a freelancer 3d graphics designer (I avoid using the word "artist"), situated in Athens, Greece.

I am a self-tought 3d graphics designer but I have studied at the "Hospitality and Tourism Management" department of the Technological Educational Institute of Crete. Despite my studies, I found 3d graphics to be much more interesting and limitless, since I could substantiate anything I could possibly imagine, either in still images or animations. Everything I now know is a result of countless hours studying, watching tutorials and of course exercise. I'm still learning new things, putting more effort towards my skills' development, trying to deliver the best out of my capabilities.
